On Wednesday, January 26, Rtn. Gerti, Rtn. Gerda, Rtn. Joy, Incoming President Carl and PP Marliese drove to Krasang to distribute 200 drinking water filters at the Ban Hua Samran school.

As always, we were given a warm welcome by PP Peter, RC Krasang, and his wife Rtn. Nitaya, RCES member, and taken to our new accommodation in Krasang.

On Thursday morning we drove to the school,

Following instructions from Rtn. Joy and Rtn. Nit,

some of the older schoolchildren enthusiastically

where the teachers, children

helped to put the filters together.

and parents were already waiting for us.

Rtn. Gerti also found it lots of fun. 😊

With tremendous help from the teachers and pupils,

We were then able to start distributing the 200 filters.

the 200 filters were ready after a good hour,

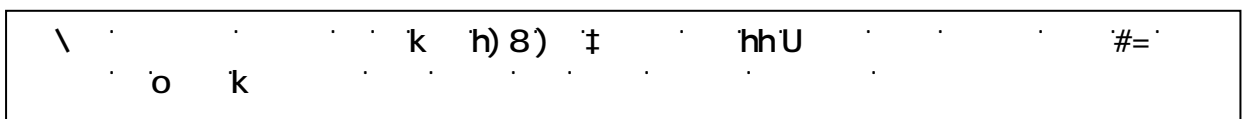

and Incoming President Carl and Rtn. Nit explained

how the filters work to the interested parents.

The parents then arranged themselves in a semicircle for a group photo.

We were then invited for a fantastic lunch

lunch prepared with lots of love

We were asked by the teachers of the nearby kindergarten

by the school's cooks.

whether we had a few water filters for the little ones

and, as it was "just around the corner", we drove there. Here, too, we were given a warm welcome. The children were having their afternoon nap, so we took a quick look around. Everything was very clean and well cared for, and as we had a few spare drinking water filters with us, we were happy to comply with their request.

We thanked all our helpers for their great work and warm hospitality.

The kitchen and

the dining area are sparkling clean!

And the kindergarten staff beamed when we gave them five drinking water filters!

We then drove on to Pittayacom school.

We had already handed out 50 water filters in November with PDG Walter and PP Mario from district 2000 CH! As we had brought three filters too few at the time, we handed these over to them

and were able to see how well the filters work in all the classrooms.
