FACTS

- All-around filter for water qualities around the world.
- The tried and tested ceramic depth filter removes bacteria, protozoa and other disease-causing agents. The principle: the micro-organisms cannot pass through the mini pores of the filter ceramic (0,2 microns) because of their size (greater than 0,2 microns = 0,0002 mm).
- Test result from Stiftung Warentest (01/2001): "Recommended" (best water filter in the test).
- Unlike disposable filters, the ceramic can be cleaned many times - even in the field.
- The Combi is additionally equipped with the water tap kit and replaces the Combi Plus.

PRODUCT CHARACTERISTICS > BENEFITS

- 2-stage filter (active carbon, ceramic) > not only removes disease-causing agents, but also chemicals and improves the taste of the drinking water
- Simple change to 1-stage operation (only ceramic without activated carbon stage) > reduces use of active carbon granules and ensures maximum use of capacity
- Robust design > long lasting and extremely reliable
- Tap add-on kit > simple connection to a tap in a kitchen, caravan, camper or boat - the only water filter for both indoor and outdoor use!
- Cleanable ceramic filter element > also filters very cloudy water
- Measuring gauge supplied > indicates when the filter element should be changed

SHORT PROFILE

All-round filter with many useful features. For 1-4 people. Trekking, travelling, expeditions. With the water tap kit, also suitable for use in caravans and boats.
