LIMITED WARRANTY

2 YEAR LIMITED WARRANTY on Katadyn Hiker / Hiker Pro

A) What is covered

Katadyn Hiker / Hiker Pro is warranted to be free from defects in materials and workmanship. 

B) How long warranty coverage lasts

This warranty lasts two years from the date of purchase of your Katadyn Hiker / Hiker Pro.

C) What Katadyn will do

In the event of a defect in material or workmanship within the two-year warranty period, Katadyn will either repair, replace or refund the purchase price of your Katadyn Hiker / Hiker Pro, at Katadyn’s sole discretion.

F) How state law applies

Some state laws do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

E) How to get service

To receive coverage under this warranty, please return your Katadyn Hiker / Hiker Pro to the retailer where you purchased the product for repair, or if you have any questions regarding this warranty, please contact Katadyn Customer Service by telephone, email or in writing:

INTENDED USE OF THE KATADYN HIKER / HIKER PRO

This microfilter is designed for personal water treatment. The filter is ideal for the removal of harmful microorganisms (bacteria, viruses, protozoa) from various water sources. The filter is not a substitute for boiling water or other methods of disinfection. The filter is not designed for the removal of chemicals or heavy metals from water. The filter is not a substitute for conventional water treatment methods such as sedimentation, filtration, or chlorination.

The EasyFill™ Bottle Adaptor (Figure 2-1) conveniently attaches directly to EasyFill™ Bottle Adaptor because it prevents large particles (larger than 130 microns) from entering the Prefilter hose to attach to the quick-connect fitting built-in to many hydration bladders. Your Katadyn Hiker / Hiker Pro includes a connector (1) that allows the output hose to attach to the quick-connect fitting built in many hydration bladders such as Camelbak, Hydrapak, etc. This connector allows easy filling of hydration bladders. See Illustration (Figure 2-1) for installation.

**PERFORMANCE TIPS**

- Always seek the best fresh water source available. Always check the Hiker/Hiker Pro before you leave to familiarize yourself with its operation.
- On extended trips, bring along a replacement cartridge.
- READ, UNDERSTAND AND FOLLOW ALL instructions and warnings in this manual before using the Katadyn Hiker / Hiker Pro. Failure to follow all warnings and instructions may result in exposure to harmful microorganisms and illnesses.
- Improper use of the Katadyn Hiker / Hiker Pro or use of a damaged or contaminated cartridge exposes you to harmful microorganisms and an increased risk of diseases.
- No water treatment will prevent all microorganisms. Microorganisms that have intact shells or skins, and always sanitize your hands properly before and after using the Katadyn Hiker / Hiker Pro. In other words, do not use.
- Do not use any water from the output hose through your Katadyn Hiker / Hiker Pro or the filter cartridge may become damaged or contaminated.
- Reduce your risk of becoming sick by following the warnings and instructions in this manual and by educating yourself on backcountry/travel illness prevention.

**WARNINGS AND WARNINGS**

- Do not use in freezing conditions (a frozen filter cartridge could lead to a microorganism bypass, resulting in illness). Do not filter any water other than fresh water through your Katadyn Hiker / Hiker Pro or the filter cartridge may become damaged or contaminated.
- When handling the Katadyn Hiker / Hiker Pro, always use non-abrasive cloth to prevent scratching the filter cartridge. Do not use any water treatment will prevent all microorganisms. Microorganisms that have intact shells or skins, and always sanitize your hands properly before and after using the Katadyn Hiker / Hiker Pro. In other words, do not use.
- Do not use any water from the output hose through your Katadyn Hiker / Hiker Pro or the filter cartridge may become damaged or contaminated.

**PRODUCT SET UP**

1. Store unit in the carry bag. To prevent the possibility of cross contamination, remove the output hose and Fast-Flow Bottle Adaptor and store separately in the re-sealable bag inside the carry bag.

**NORMAL OPERATION**

1. Place input hose in the fresh water source. Adjust the float to keep Prefilter submersed in the water. Disassemble the pump whenever you are not using the unit.
2. Remove the handle collar and handle. (Figure 1-1) Clean excess build-up from black strainer barb. Reassemble without the weight.
3. Rinse the prefilter in water to remove any particles that may be present. Check Valve can easily be cleaned to restore maximum water output. Remove the check valve from the output hose and rinse under running water. Reassemble.
4. Remove the handle and check the handle shaft for any debris. Discard used cartridge in the appropriate container before it is placed in the carry bag. Always inspect the filter cartridge before use. If the filter cartridge is damaged or contaminated, do not use.
5. Rinse the prefilter in water to remove any particles that may be present. Check Valve can easily be cleaned to restore maximum water output. Remove the check valve from the output hose and rinse under running water. Reassemble.
6. Maintain your Katadyn water system to keep it operating smoothly. If water treatment is required to be performed, consult the appropriate water treatment instructions for the unit. See following section on Normal Operation on how to use the Katadyn Hiker / Hiker Pro.

**PERFORMANCE TIPS**

- Do not use any water from the output hose through your Katadyn Hiker / Hiker Pro or the filter cartridge may become damaged or contaminated.

**FILTER CARTRIDGE COMPATIBILITY & REPLACEMENT**

Cartridge capacity depends on water quality. The Katadyn Hiker / Hiker Pro were tested at 70°C / 180°F and hand abrasion for removal of bacteria, Vibrio cholerae and protozoan cysts (Giardia), Cryptosporidium. For optimal performance, cartridges should be replaced after 700 / 1150 liters as when the filter becomes hard to pump. Replacement cartridges are available from the dealer where you purchased your Katadyn Hiker / Hiker Pro.

1. Remove output hose from cartridge output. Grasp the top of the Hiker / Hiker Pro cartridge and turn counterclockwise. For further assistance, see Cartridge Removal Instructions (Illustration 4-1). Remove the handle collar and handle. Grasp the handle collar and turn counterclockwise.
2. Place unit in cleaning solution. Make sure the unit is clean and dry before reusing. Discard used cartridge in the appropriate container before it is placed in the carry bag.
3. Rinse new cartridge from packaging. Inspect the cartridge for any damage. Discard any unused cartridge in the appropriate container before it is placed in the carry bag.
4. Reassemble inside of housing with water treatment (non-filtered water) is filtered. Discard water that has been inside of housing and housing threads are contaminated. Inspect the cartridge for any damage. Discard any unused cartridge in the appropriate container before it is placed in the carry bag.
5. Reattach output hose to cartridge output. (Figure 1-7)
6. Push filter cartridge by pumping and discarding the first two
